

EuroFire 2011

5th European Conference

Fire Safety Engineering:
Trends and Practical Applications

Paris

25-27 May 2011

www.eurofireconference.com

After the success of Eurofire 2009 in Brugge, the 5th Eurofire conference will be convened in Paris, France, to highlight the evolution in fire safety during these last 2 years and its positive impact on the construction industry.

As part of the 200 year celebrations of the Parisian Fire Brigade, the BSPP, will host Eurofire at the prestigious *Ecole Militaire*. The conference venue is located in central Paris close to the Eiffel Tower.

Eurofire aims to present, discuss and debate the fire safety technologies used to improve fire safety in buildings. The 2011 conference will particularly focus on the *Trends in Fire Safety Engineering and the Practical Applications* which have been rapidly developing. For example the special needs of very tall buildings and the challenges these present to the fire engineering world. An international programme of speakers has already been assembled with 40 papers being presented over the 3 days.

These will be addressed in the following Technical Sessions:-

- International Fire Safety Trends and The Economic Impact on Society
- Prescriptive Codes and FSE
- FSE Case Studies
- Active Fire Protection In FSE Design
- Smoke Control – Its Role in FSE Approaches
- FSE in very Tall Buildings
- Education in FSE
- Passive Fire Protection
- Evacuation Modeling In FSE
- Fire Safety Management

The Steering Committee is particularly pleased to have secured the specialist papers on :

Fire Safety in very tall buildings, "Burj Khalifa " Dubai by the project architect and fire engineers and Financial consequence of fires on the national social security systems, by the European Burns Casualties Association.

Other important topics to be discussed are:

- Metro and Tunnel Fire Protection
- Watermist
- Smoke Control
- Structural Fire Safety
- Fire Safety Techniques
- Developments in Smoke Control Design
- Fire Safety Assessment
- FSE Case Studies

Burj Khalifa

The venue -- the prestigious *Ecole Militaire* -- houses the facilities for French military training and boasts state-of-the-art lecture facilities in the Auditorium Foch. This historic building was founded by Louis XV in 1750 with the support of Madame de Pompadour, with the aim of creating an academic college for cadet officers. Napoleon Bonaparte graduated from here in 1784.

The conference language is English with English/French simultaneous translation

Delegates to Paris will have the opportunity to see this beautiful city during our Conference Dinner which takes the form of a dinner cruise along the Seine on one of the famous Bateaux Parisiens boats.

The conference is being co-organised by :
